SPYDER TECHNOLOGIES

Spyder technologies are developed
with performance and comfort in mind.

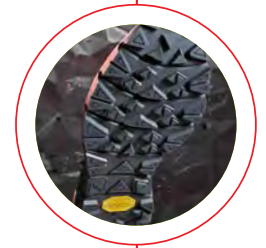

Spyder Technologies are developed with performance and comfort in mind.

Rebound Technology™ is a multi-layered, cushion impact system with an antimicrobial shield to combat odor.

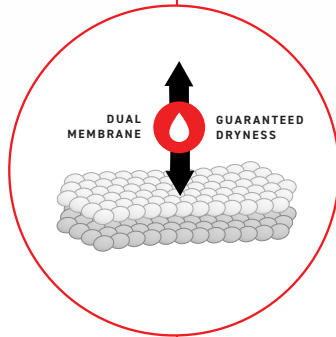

Water-Resistant Technology is a breathable, lightweight and flexible material that keeps you warm & dry.

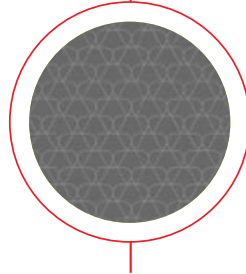

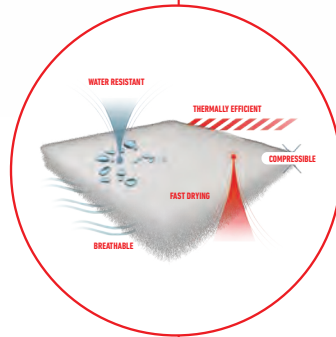

Vibram Megagrip offers excellent grip properties on both dry and wet terrains while maintaining a higher level of durability.

Ascent5 technology includes a 5-piece tooling with high tech suspension, shock absorption layers and extreme tread with traction for uphill & downhill terrain.

SpyDry, a dual waterproof layer features a membrane for guaranteed dryness.

Primaloft Insulation, made of 100% postconsumer recycled material, delivers environmental responsible loft and warmth for performance, and comfort.

MEN'S MOUNTAIN SPORT

Technically crafted, adaptable and stylish to take you to and from the mountain top. Full Rubber Traction Outsoles with wrap-up in the forefoot and toe for extra protection and support.
